Corp B — In-app collectible escrow (no vault partner)

Legal and product posture for **seller P2P slab listings** where Goeman holds buyer USDC in escrow until receipt is confirmed. This is **Tier 2** in the collectibles strategy: Goeman is the payment intermediary; the seller ships directly; no Courtyard/vault custody partner is required for the money path.

1 What ships in the prototype

Layer	Implementation
Money	Existing <code>escrowService</code> — payer_cash → escrow → payee_cash (USDC on Hedera when enabled)
Asset	Tokenized HTS collectible (qty 1) delivered from treasury on buyer confirm
Listing	<code>listingType: seller_p2p</code> in asset metadata; instant <code>placeOrder</code> blocked
State	<code>collectible_purchases</code> + escrow row; listing paused while open
Kill-switch	<code>COLLECTIBLES_ESCROW_ENABLED</code> (off by default; prod-fatal when on)

2 User flow

1. **Seller** — cert verify → human review → public listing (`/collect/sell`)
2. **Buyer** — `Buy with escrow` on asset detail → USDC held (`POST /api/collectibles/purchase`)
3. **Seller** — marks shipped (`POST /api/collectibles/purchases/:id/ship`)
4. **Buyer** — confirms receipt → escrow release + asset to buyer (`POST .../confirm`)
5. **Dispute** — either party disputes; compliance/admin resolves via existing `/api/admin/escrow/:id/resolve` (asset delivery syncs automatically)

3 Corp B triggers (counsel before production)

- **Money transmission / MSB** — holding third-party funds pending performance

- **Marketplace intermediary** — connecting buyers and sellers; dispute mediation
- **Not custody** — Goeman does not take possession of the physical slab in this lane (seller ships)
- **Securities** — seller P2P collectibles are non-security HTS collectibles (`isSecurity: false`)

4 Config

```
# Dev/demo – enable in-app buy/escrow
COLLECTIBLES_ESCROW_ENABLED=true

# Production – blocked until counsel + licensing path (see CORP-B-RAMP.md)
# COLLECTIBLES_ESCROW_ENABLED=true # → process refuses to start
```

5 API surface

POST	/api/collectibles/purchase	Idempotency-Key required
GET	/api/collectibles/purchases	
GET	/api/collectibles/purchases/:id	
POST	/api/collectibles/purchases/:id/ship	seller
POST	/api/collectibles/purchases/:id/confirm	buyer
POST	/api/collectibles/purchases/:id/cancel	seller (before ship)
POST	/api/collectibles/purchases/:id/dispute	either party

Generic `/api/escrow/:id/release|refund` is **blocked** when the escrow row is tied to a collectible purchase — use the purchase endpoints instead.

6 Differentiation from Tier 3 (Courtyard)

	Tier 2 (this)	Tier 3 (partner)
Physical custody	Seller ships	Vault partner holds
Cert attestation	PSA/GemRate API + human review	Partner inventory sync
Config	<code>COLLECTIBLES_ESCROW_ENABLED</code>	<code>COLLECTIBLES_PROVIDER=courtyard</code>
Legal surface	MSB / marketplace intermediary	Custody + bailee agreements

7 Frontend

- Asset detail — **Buy with escrow** for `purchaseMode: escrow`
- `/collect/purchases` — buyer/seller actions (ship, confirm, dispute)
- Admin dispute queue unchanged (`/admin` → escrow disputes)
